# SUBJECT INDEX

1975, Volume 9

## A

- Acetylcholine, inhibitory action on potassium uptake of sinus node, 490
- injection into sinus node artery of atrium, chronotropic response, dog, 127
- Adenosine triphosphatase, sodium- and potassium-activated cardiac muscle, glucagon-induced changes, 355
- Adrenaline-induced acute massive lung oedema, haemodynamic changes, dog, 105
- Adrenergic blocking agents, effect on intrarenal blood flow, baboon, 314
- $\beta$ -Adrenoceptor blockade, prolonged, effects on heart weight and cardiac intracellular potentials, rabbits, 579
- Albumin,  $^{125}$ I, uptake by endothelial surface of isolated dog common carotid artery, 478
- Alcohol feeding, prolonged, causing myocardial lesions, rhesus monkeys, 134
- Alcoholic cardiomyopathy, effects of chronic graded ethanol consumption on metabolism, ultrastructure, and mechanical function of rat heart, 649
- Aminophylline, inhibition of coronary dilation by, 532
- Ammonium chloride perfusion, glutamine production by isolated rat heart during, 295
- Anaesthetics, local, effects on calcium transport by canine cardiac microsomes (fragmented sarcoplasmic reticulum), 764
- Angiotensin II, vascular reactivity in rat perfused mesenteric vasculature preparation during development of renal hypertension, 118
- Anoxia, effect of glucose and temperature on contractile response during, 201
- Antiarrhythmic agent N,N-bis(phenylcarbamoylmethyl)-dimethyl-ammonium chloride. *See* QX-572
- Aorta, abdominal, dynamic and static elastic response, dog, 679
- developing and mature, static mechanical properties, rat, 669
- Aortic regurgitation, experimental, simplified technique for production: instruments and techniques, 440
- Arterial pressure. *See* Blood pressure, arterial
- Artery, coronary. *See* Coronary artery
- Atrial pacing, rapid, as test of atrioventricular conduction, electrophysiological significance, 593
- stimulation, premature, use to analyse sino-atrial conduction, 498
- Atrioventricular conduction, electrophysiological significance of rapid atrial pacing, 593
- Atropine, electrophysiology, 73
- Autoperfusing heart-lung preparation, short-term preservation, haemodynamic studies, 753

## B

- Blood flow, coronary, effect of cardiac tamponade, dog, 112
- , —, regional, changes with hypertonic mannitol, dog, 47
- , —, forearm, changes in pressure, influence of age and level of arterial blood pressure, 56
- , —, myocardial, regional, investigations using isolated supported heart preparation, 634
- , —, — and ventricular performance in awake intact dogs with prolonged coronary artery occlusion, effect of hypertonic mannitol, 409

- Blood flow, myocardial, and ST-segment elevation, relationship during myocardial ischaemia, dogs, 627
- , —, left ventricular coronary, variable effects of heart rate, dog, 1
- , —, —, effect of propranolol and isoprenaline in experimental myocardial ischaemia, 178
- , —, renal, effect of noradrenaline, adrenergic blocking agents, and tyramine, baboon, 314
- pressure, arterial, effects of three fat-enriched diets, rabbits, 807
- , —, —, influence of age and level on changes in forearm blood flow, 56
- , —, high, during myocardial ischaemia, dogs, 373
- , —, and pulse rate in cardiac surgery patients, short-term variability, 734
- transfusions, intra-arterial, pathological effects, dogs, 685
- volume, pulmonary, determination, use of modified double dye injection method. III. Validation in man, 272
- Bretylium and lidocaine in ventricular fibrillation, rabbit, 19

## C

- Calcium-induced damage of rat heart mitochondria, 366
- transport, effects of local anaesthetics, canine cardiac microsomes (fragmented sarcoplasmic reticulum), 764
- Cardiac denervation and induced right ventricular failure, absence of effects on canine myocardial norepinephrine binding sites, 219
- muscle, glucagon-induced changes in the action potential, contraction, and  $\text{Na}^+ - \text{K}^+ - \text{ATPase}$  of, 355
- performance, effects of hyperpotassaemia, 212
- Cardiovascular system, effects of lower body negative pressure, rabbit, 190
- Carotid arteries, uptake of  $^{125}$ I by endothelial surface, dog, 478
- Catecholamines, effects on coronary circulation in Langendorff-type transplanted dog heart, 779
- Circulation, coronary. *See* Coronary circulation
- Collagen, myocardial, during development, 187
- Collateral vessels, heart, and oxygen demand, 640
- Compliance, left ventricular, model for assessment, effect of hypertrophy and infarction, 544
- Conduction, intracardiac, effect of thyroid hormone in acute and chronic hyperthyroid animals, 524
- , sino-atrial, analysis using premature atrial stimulation, 498
- Congenital heart disease, simplified parameter of LV function, 397
- Contractile response, effect of glucose and temperature on during anoxia, 201
- Contraction, heart, mechanical effects on coronary flow, 509
- , —, isovolumic, ventricular performance during, 29
- , —, fractional rate of change of power during, dogs, 456
- , —, myocardial, effects of hypoxia, cyanide, and ischaemia, 38
- Coronary arteries, isolated, effects of dopamine, dog, 384
- , —, ligation, relationship of intramyocardial oxygen tension and epicardial ST segment changes following, 12
- , —, —, effects of isoprenaline on epicardial ST-segment elevation, lactate production and myocardial blood flow following, 770
- circulation, in Langendorff-type transplanted dog heart, effects of catecholamines, 779

- Coronary dilation, inhibition by aminophylline, 532
- embolization, response of renal and femoral vascular beds, dog, 151
- flow, mechanical effects of heart contraction, 509
- resistance, extravascular, active and passive components, 161
- sinus  $pO_2$  and  $O_2$  saturation, alterations resulting from  $pCO_2$  changes, 167
- Creatine phosphokinase, isoenzymes, fractional disappearance rate, dog, 473
- Current threshold, electrode radius, and excitation in heart muscle, dog, 95
- Cyanide, hypoxia, and ischaemia, effect on myocardial contraction, 38

## D

- Diameter, left ventricular internal, changes with increasing pericardial pressure, 707
- Diets, fat-enriched, effects on arterial pressure, rabbits, 807
- Digitalis toxicity, progressive, contractile and electrophysiological responses, 65
- Digoxin, in normo- and hyperkalaemia, associated biochemical changes, 515
- Dopamine, effects on isolated canine coronary arteries, 384
- Drugs, abused, intra-arterial injection, 266

## E

- Echocardiograms, recording during upright exercise, design and function of a mechanical assembly: instruments and techniques, 145
- Electrocardiograms, effect of oral propranolol on changes occurring during subarachnoid haemorrhage, 236
- Electrodes, externally pressurized, measurement of  $PO_2$  and  $PCO_2$  of gases and liquids at 2Atm using: instruments and techniques, 281
- radius, current threshold, and excitation in heart muscle, dog, 95
- Electrolytes and water in severe acute hypoxia, 249
- Embolization, coronary, response of renal and femoral vascular beds, dog, 151
- Ethanol consumption, chronic graded, effects on the metabolism, ultrastructure, and mechanical function, rat heart, 649
- , inducing left ventricular failure: instruments and techniques, 286
- Excitation, current threshold, and electrode radius in heart muscle, 95
- Exercise, dynamic and static, plasma renin activity during and after, 323
- , responses in experimental hypertension, 745
- , upright, design and function of mechanical assembly of recording echocardiograms during: instruments and techniques, 145

## F

- Fat-enriched diets, effects on arterial pressure, 807
- Fibrillation, ventricular threshold, in myocardial infarction, and infarct size, 468
- , —, vulnerable period in isolated perfused rat heart, 613

## G

- Glomerular filtration rate, changes following myocardial infarction, 741
- Glucagon-induced changes in the action potential, contraction, and  $Na^+ - K^+ - ATPase$  of cardiac muscle, 355
- Glucose and temperature, effect on contractile response during anoxia, 201
- Glutamine production by isolated perfused rat heart during ammonium chloride perfusion, 295

## H

- Haemodynamic effects, new anti-arrhythmic agent (Kö 1173) in ischaemic heart disease, 788
- studies, during short-term preservation of the autoperfusing heart-lung preparation, 753
- Haemorrhage, renin-angiotensin-vasoconstrictor system during, quantitative analysis in areflexic dogs, 722
- contraction, mechanical effects on coronary flow, 509
- , ischaemic contracture (stone heart), 246
- rate, variable effects on phasic and regional left ventricular muscle blood flow, dog, 1
- subarachnoid. See Subarachnoid haemorrhage
- weight, and intracellular potentials, effects of prolonged  $\beta$ -adrenoreceptor blockade, rabbits, 579
- His-bundle activity, surface detection, 390
- Hyperkalaemia, digoxin in, and in normal, associated biochemical changes, 515
- Hyperkinetic heart syndrome, stress-induced and sympathetically-mediated electrocardiographic and circulatory variations in, 342
- Hyperpotassaemia, effects on cardiac performance, 212
- Hypertension, experimental, response to exercise, 745
- , renal estimation of non-autonomic and autonomic components of iliac bed vascular resistance, rabbits, 697
- Hypertrophic right ventricle, activation, dog, 302
- Hypoxia, cyanide and ischaemia, effects on myocardial contraction, 38
- , severe acute, effects on distribution of cardiac electrolytes and water, 249
- 50 Hz leakage currents producing disturbances of heart rhythm, dogs, 256; in human subjects, 263

## I

- Iliac bed vascular resistance, non-autonomic and autonomic components, estimation in renal hypertension, rabbits, 697
- Infarct size, effects of verapamil on, following experimental coronary occlusion, 569
- , relation to ventricular fibrillation threshold in myocardial infarction, 468
- Injection, intra-arterial, of abused drugs, 266
- Instruments and techniques: A new method for the direct estimation of blood oxygen content, 443
- Observations on left ventricular failure induced by ethanol, 286
- A simplified technique for the production of experimental aortic regurgitation, 440
- Intra-arterial injection of abused drugs, 266
- Intracardiac conduction, effect of thyroid hormone on, in acute and chronic hyperthyroid animals, 524
- Intracellular potentials, cardiac, and heart weight, effects of prolonged  $\beta$ -adrenoreceptor blockade, rabbits, 579
- Ischaemia, hypoxia, and cyanide, effects on myocardial contraction, 38
- , myocardial, experimental, effect of propranolol and isoprenaline on regional left ventricular blood flow in 178
- , —, relationship between ST-segment elevation and local tissue flow during, dogs, 627
- , subendothelial, isoproterenol-induced, effects of prindolol in dogs with multiple chronic coronary artery occlusion, 561
- Ischaemic contracture of the heart (stone heart), 246
- heart disease, haemodynamic effects of new anti-arrhythmic agent, mexiletine (Kö 1173), 788
- Isoenzymes, creatine phosphokinase, fractional disappearance rate, dog, 473
- Isoprenaline, effects on epicardial ST-segment elevation, lactate production and myocardial blood flow following coronary artery ligation, 770

- Isoprenaline, and propranolol, effect on myocardial ornithine decarboxylase, rat, 793  
 —, effect on regional left ventricular blood flow in experimental myocardial ischaemia, 178  
 —, induced changes in ventricular myocardium, quantitation, 797

Isovolumic contraction. *See* Contraction, isovolumic

## K

Kö 1173. *See* Mexiletine

## L

- Lactate production, epicardial ST-segment elevation, and myocardial blood flow following coronary artery ligations, effects of isoprenaline, 770  
 Langendorff-type transplanted dog heart, effects of catecholamines on coronary circulation, 779  
 Lead systems, orthogonal, signal content with respect to total body information, 224  
 Leakage currents, 50 Hz, producing disturbances of heart rhythm, dogs, 256; in human subjects, 263  
 Lex-O<sub>2</sub>-Con, for direct estimation of blood oxygen content: instruments and techniques, 443  
 Lidocaine and bretylium in ventricular fibrillation, rabbit, 19  
 —, hydrochloride, effect on effective refractory period of right ventricle, 621  
 Lower body negative pressure, effects on cardiovascular system, rabbit, 190  
 Lung oedema, acute massive, adrenaline-induced, haemodynamic changes, dog, 105

## M

- Mannitol, hypertonic, effect on regional coronary blood flow, dog, 47  
 —, influence on regional myocardial blood flow and ventricular performance in awake intact dogs with prolonged coronary artery occlusion, 409  
 Membrane potential, effect on ouabain toxicity, sheep cardiac Purkinje fibres, 600  
 Mexiletine (Kö 1173), anti-arrhythmic agent, in ischaemic heart disease, haemodynamic effects, 788  
 Microsomes, canine (fragmented sarcoplasmic reticulum) effects of local anaesthetics on calcium transport by, 764  
 Mitochondria, rat-heart, calcium-induced damage, 366  
 Muscle, heart, current threshold, electrode radius, and excitation in, 95  
 Myocardial blood flow, epicardial ST-segment elevation and lactate production, following coronary artery ligation, effects of isoprenaline, 770  
 —, regional, investigation using isolated supported heart preparation, 634  
 —, function, in general and left ventricular ischaemia, control and high aortic blood pressure, 373  
 —, pressure-derived indices, and congenital heart disease, 397  
 —, infarction, experimental, effects of isoprenaline, 770  
 —, glomerular filtration rate changes following, 741  
 —, statistical prognostic study of pump failure, 420  
 —, ventricular fibrillation threshold, and infarct size, 468  
 —, lesions, induction by prolonged alcohol feeding, rhesus monkeys, 134  
 —, ornithine decarboxylase, effect of isoprenaline and propranolol, rat, 793  
 —, oxygen consumption, at left ventricular workload and varying arterial oxygenation, 811  
 Myocardium, ventricular, isoprenaline-induced changes, quantitation, 797

## N

N,N-bis(phenylcarbamoylmethyl)dimethyl-ammonium chloride. *See* QX-572

- Na<sup>+</sup>-K<sup>+</sup>-ATPase. *See* Sodium- and potassium-activated adenosine triphosphatase  
 Noradrenaline, effect on renal blood flow, baboon 314  
 —, vascular reactivity in rat perfused mesenteric vasculature preparation during development of renal hypertension, 118  
 Norepinephrine binding sites in cardiac denervation and induced right ventricular failure 219  
 —, handling, comparison in myocardium in adult and old rats, 664

## O

- Ornithine decarboxylase, myocardial, effect of isoprenaline and propranolol, rat, 792  
 Orthogonal lead systems, corrected, signal content with respect to total body information, 224  
 Ouabain toxicity, effect of membrane potential, sheep cardiac Purkinje fibres, 600  
 Oxygen, blood content, new method, Lex-O<sub>2</sub>-Con; instruments and techniques, 443  
 —, consumption, myocardial, at constant left ventricular workload and varying arterial oxygenation, 811  
 —, demand and collateral vessels of the heart, 640  
 —, O<sub>2</sub>, pO<sub>2</sub> and pCO<sub>2</sub> saturation, coronary sinus, 167  
 —, tension, intramyocardial, and epicardial ST-segment changes, relationship following acute coronary perfusion pressure, 12  
 Oxygenation, arterial, varying, myocardial oxygen consumption, 811

## P

- Peak dP/dt, effect of varying differentiator frequency response, 433  
 Pericardial sac, as safety factor during tamponade, 715  
 —, pressure, increasing, and changes in left ventricular internal diameter, 707  
 pO<sub>2</sub>, pCO<sub>2</sub> and O<sub>2</sub> saturation, coronary, 167  
 Po<sub>2</sub> and Pco<sub>2</sub> of gases and liquids at 2Ata, measurement, using externally pressurized electrodes: instruments and techniques, 281  
 Postectopic beats, in normal and failing heart, using indices from catheter-tip manometer readings, 336  
 Potassium chloride, vascular reactivity in rat perfused mesenteric vasculature preparation during development of renal hypertension, 118  
 —, radioactive isotopes, dynamics of tissue distribution, as affected by simulated differences in regional extraction, 607  
 —, uptake of sinus node, inhibitory action of acetylcholine, 490  
 Pressure, negative, lower body, effects on cardiovascular system, 190  
*See also* Blood pressure  
 Prindolol, effects on isoproterenol-induced subendothelial ischaemia, dogs with multiple chronic coronary artery occlusion, 561  
 Propranolol and isoprenaline, effect on myocardial ornithine decarboxylase, rat, 793  
 —, effect on regional left ventricular blood flow in experimental myocardial ischaemia, 178  
 —, oral, effect on ECG changes occurring during subarachnoid haemorrhage, 236  
 Prostaglandins, effects on resistance and capacitance in canine hind limb, 229  
 Prosthetic heart valve action, ultrasonic measurement, 554  
 Protamine- and protamine-heparin complex-induced pulmonary vasoconstriction, isolated cat lung perfused with blood or dextran, 691  
 Proteins, myocardial cytoplasmic acidic inhibitor, separation, 141

- Pulmonary blood volume determination, use of modified double dye injection method. III. Validation in man, 272  
 Pulse rate and blood pressure, in cardiac surgery patients, short-term variability, 734  
 Pump failure, statistical prognostic study in myocardial infarction, 420  
 Purkinje fibres, cardiac, effect of membrane potential on ouabain toxicity, sheep, 600

## Q

- QX-572, antiarrhythmic agent, electrophysiological effects in heart, special reference to refractory periods, 81

## R

- Radiopotassium, *see* Potassium  
 Renal hypertension, estimation of non-autonomic and autonomic components of iliac bed vascular resistance, rabbits, 697  
 —, vascular reactivity to noradrenaline, potassium chloride, and angiotensin II in rat perfused mesenteric vasculature preparation, 118  
 Regurgitation, aortic, experimental, simplified technique for production: instruments and techniques, 440  
 Renin-angiotensin-vasoconstrictor system during haemorrhage, quantitative analysis in areflexic dogs, 722  
 —, plasma, activity during and after dynamic and static exercise, 323  
 Rhythm, heart, disturbances produced by 50 Hz leakage currents, dogs, 256; in human subjects, 263

## S

- Saphenous vein segment, changes in flow and pressure due to rotation, 538  
 —, optimal length when used as arterial substitute, 541  
 Sarcoplasmic reticulum, fragmented, effects of local anaesthetics on calcium transport, 764  
 SI units, introduction to *Cardiovascular Research*, 149  
 Sino-atrial conduction, analysis using premature atrial stimulation, 498  
 Sinus node artery, chronotropic response of acetylcholine injection, dog, 127  
 —, potassium uptake, inhibitory action of acetylcholine, 490  
 Sodium- and potassium-activated adenosine triphosphatase, cardiac muscle, glucagon-induced changes, 355  
 ST-segment elevation, epicardial, and intramyocardial oxygen tension, relationship following acute coronary artery ligation, 12  
 —, lactate production and myocardial blood flow, effects of isoprenaline following coronary artery ligation, 770  
 — and local tissue flow, relationship between during myocardial ischaemia, dogs, 627  
 Stone heart, aetiology, 246  
 Subarachnoid haemorrhage, effect of oral propranolol on ECG changes occurring in, 236  
 Suction, cardiovascular responses to, rabbit, 190  
 Systolic pressure-diameter relations, normal conscious dog, 447

## T

- Tamponade, cardiac, effect on coronary blood flow, dog, 112  
 — pericardial sac as safety factor during, 715  
 Temperature and glucose, effect on contractile response during anoxia, 201  
 Thyroid hormone effect on intracardiac conduction in acute and chronic hyperthyroid animals, 524  
 Transfusions, blood, intra-arterial, pathological effects, dogs, 685  
 Tyramine, effect on renal blood flow, baboon, 314

## V

- Valves, heart, prosthetic, ultrasonic measurement of action, 554  
 Vascular beds, renal and femoral, response to coronary embolization, dog, 151  
 Vasoconstriction, pulmonary, produced by protamine and protamine-heparin complex in isolated cat lung perfused with blood or dextran, 691  
 Vectorcardiographic systems analysis, 224  
 Ventricular failure, left, induced by ethanol: instruments and techniques, 286  
 —, induced, right, and cardiac denervation, absence of effects on canine myocardial norepinephrine binding sites, 219  
 — fibrillation, effects of bretylium and lidocaine, rabbit, 19  
 —, threshold, myocardial infarction, and infarct size, 468  
 — and vulnerable period in isolated perfused rat heart, 613  
 — internal diameter, left, changes with increasing pericardial pressure, 707  
 — myocardium, isoprenaline-induced changes, quantitation 797  
 — performance during isovolumic contraction, 29  
 — power, fractional rate of change during isovolumic contraction, dogs, 456  
 Ventricle, left, compliance, model for assessment, effect of hypertrophy and infarction, 544  
 —, function, simplified parameter in children with congenital heart disease, 397  
 —, volume, continuous measurement using single dimensional transducer, dogs, 327  
 —, right, effective refractory period, effect of lidocaine hydrochloride, 621  
 —, hypertrophy, activation, dog, 302  
 Verapamil, effects on infarct size following experimental coronary occlusion, 569

## W

- Water and electrolytes, in severe acute hypoxia, 249  
 Wedge injection method for pulmonary blood volume determination. III. Validation in man, 272

## X

- <sup>133</sup>Xenon clearance technique for intrarenal distribution of blood flow, baboon, 314

# CONTENTS

No. 1. JANUARY, 1975

<b>Variable effects of heart rate on phasic and regional left ventricular muscle blood flow in anesthetized dogs:</b> Gerald D. Buckberg, David E. Fixler, Joseph P. Archie, R. Peter Henney, and Julien I. E. Hoffman . . . . .	1
<b>Relationship of intramyocardial oxygen tension and epicardial ST segment changes following acute coronary artery ligation: effects of coronary perfusion pressure:</b> Charles S. Angell, Edward G. Lakatta, Myron L. Weisfeldt, and Nathan W. Shock . . . . .	12
<b>Effects of bretylium and lidocaine on ventricular fibrillation in the isolated rabbit heart:</b> V. Aravindakshan and Leonard S. Gettes . . . . .	19
<b>Ventricular performance and energy of compression, power, and rate of change of power during isovolumic contraction:</b> Paul D. Stein, G. Grady McBride, and H. N. Sabbah . . . . .	29
<b>Effects of hypoxia, cyanide, and ischaemia on myocardial contraction: observations in isolated muscle and intact heart:</b> Farouk A. Pirzada, William B. Hood, Jr, Joseph V. Messer, and Oscar H. L. Bing . . . . .	38
<b>Changes in regional coronary blood flow with hypertonic mannitol in conscious dogs:</b> Ian Hutton, Samuel P. Marynick, David E. Fixler, Gordon H. Templeton, and James T. Willerson . . . . .	47
<b>The influence of age and the level of arterial blood pressure on the changes in forearm blood flow resulting from sudden alterations in local vascular transmural pressure:</b> P. H. Fentem and Janet M. Yates . . . . .	56
<b>Contractile and electrophysiological responses to progressive digitalis toxicity:</b> V. S. Banka, B. J. Scherlag, and R. H. Helfant . . . . .	65
<b>Electrophysiology of atropine:</b> J. K. Bissett, N. D. B. de Soyza, J. J. Kane, and M. L. Murphy . . . . .	73
<b>Electrophysiological effects of the antiarrhythmic agent QX-572 in the human heart with special reference to rate-induced changes in effective refractory periods:</b> L. Rydén, B. Olsson, and J. Kvasnička . . . . .	81
<b>Site of initial excitation and current threshold as a function of electrode radius in heart muscle:</b> Fred W. Lindemans, Robert M. Heethaar, Jan J. Denier van der Gon, and Ariaen N. E. Zimmerman . . . . .	95
<b>Haemodynamic changes in adrenaline-induced acute massive lung oedema:</b> C. P. K. Cheng . . . . .	105
<b>The effect of cardiac tamponade on coronary haemodynamics in the awake dog:</b> Jay M. M. Jarmakani, Philip A. McHale, and Joseph C. Greenfield, Jr . . . . .	112
<b>Vascular reactivity to noradrenaline, potassium chloride, and angiotensin II in the rat perfused mesenteric vasculature preparation, during the development of renal hypertension:</b> M. G. Collis and B. J. Alps . . . . .	118
<b>Chronotropic response to acetylcholine injected into the sinus node artery of the isolated atrium of the dog:</b> Shigetoshi Chiba, Matthew N. Levy, and Harrison Zieske . . . . .	127
<b>Myocardial lesions induced by prolonged alcohol feeding in rhesus monkeys:</b> S. C. Vasdev, R. N. Chakravarti, D. Subrahmanyam, A. C. Jain, and P. L. Wahi . . . . .	134
<b>Separation of myocardial cytoplasmic acidic inhibitor proteins which inhibit hepatic protein biosynthesis <i>in vitro</i>:</b> Keith I. Gibson . . . . .	141

### *Instruments and techniques*

<b>Design and function of a mechanical assembly for recording echocardiograms during upright exercise:</b> David R. Redwood, Walter L. Henry, Seth Goldstein, and Eldon R. Smith . . . . .	145
<b>SI Units: an announcement</b> . . . . .	150

### *No. 2. MARCH, 1975*

<b>The response of the renal and femoral vascular beds to coronary embolization in the dog:</b> Raul E. Falicov, Christopher J. Mills, and Ivor T. Gabe . . . . .	151
<b>The active and passive components of extravascular coronary resistance:</b> Roger Snyder, James M. Downey, and Edward S. Kirk . . . . .	161
<b>Alterations in coronary sinus <math>pO_2</math> and <math>O_2</math> saturation resulting from <math>pCO_2</math> changes:</b> Robert B. Case, Henry Greenberg, and Robert Moskowitz . . . . .	167
<b>Effect of propranolol and isoprenaline on regional left ventricular blood flow in experimental myocardial ischaemia:</b> Lewis C. Becker, Rafael Ferreira, and Michael Thomas . . . . .	178
<b>Collagen and the myocardium. A study of their normal development and relationship in the rabbit:</b> P. G. Caspari, K. Gibson, and P. Harris . . . . .	187
<b>The effects of lower body negative pressure on the cardiovascular system of the anaesthetized rabbit:</b> Janet M. Yates and P. H. Fentem . . . . .	190
<b>Influence of increased glucose concentration and temperature on contractile activity of rat papillary muscles during and after anoxia:</b> Eulogio E. Martinez and David E. Jewitt . . . . .	201
<b>The effects of hyperpotassaemia on cardiac performance:</b> Kensuke Kaseno, Tsuneaki Sugimoto, Kunihiro Hirasawa, Tohru Inasaka, Tetsuo Nohara, Tadao Uraoka, and Jugoro Takeuchi . . . . .	212
<b>Absence of effect of cardiac denervation and induced right ventricular failure on canine myocardial norepinephrine binding sites</b> Dennis D. O'Keefe, Robert J. Lefkowitz, R. Nathan Grantham, Edward A. Beierholm, and Willard M. Daggett . . . . .	219
<b>The signal content of three corrected orthogonal lead systems with respect to total body information:</b> R. H. Bourgain, P. Block, and F. Kornreich . . . . .	224
<b>Effects of prostaglandins <math>E_1</math>, <math>E_2</math>, <math>A_1</math>, and <math>A_2</math> on the resistance and capacitance vessels in the hind limb of the dog:</b> J. Conway and R. Hatton . . . . .	229
<b>The effect of oral propranolol upon the ECG changes occurring in subarachnoid haemorrhage:</b> J. M. Cruickshank, G. Neil-Dwyer, and J. Lane . . . . .	236
<b>Observations on ischaemic contracture of the heart ('stone heart'):</b> D. K. C. Cooper . . . . .	246
<b>Effects of severe acute hypoxia on the distribution of cardiac electrolytes and water:</b> Philip I. Polimeni . . . . .	249
<b>Disturbances of heart rhythm produced by 50 Hz leakage currents in dogs:</b> E. B. Raftery, H. L. Green, and I. C. Gregory . . . . .	256
<b>Disturbances of heart rhythm produced by 50 Hz leakage currents in human subjects:</b> E. B. Raftery, H. L. Green, and M. H. Yacoub . . . . .	263
<b>Intra-arterial injection of abused drugs:</b> Ernest C. Alix, George P. Bogumill, and Creighton B. Wright . . . . .	266
<b>A modified double dye injection method for pulmonary blood volume determination. III. Validation in man:</b> J. Mensch-Dechène, B. Ranson-Bitker, J. R. Caldera, L. Briançon, and A. Lockhart . . . . .	272

### *Instruments and techniques*

<b>Measurement of <math>P_{O_2}</math> and <math>P_{CO_2}</math> of gases and liquids at 2Ata using externally pressurized electrodes:</b> J. P. Blackburn, H. Connor, F. M. Davis, T. W. Greenwood, P. Marks, and H. F. Seeley . . . . .	281
<b>Observations on left ventricular failure induced by ethanol:</b> Richard D. Jones, Jerome I. Kleinerman, and Myron H. Luria . . . . .	286

### *No. 3. MAY, 1975*

<b>Glutamine production by the isolated perfused rat heart during ammonium chloride perfusion:</b> Sidney Davidson and Edmund H. Sonnenblick . . . . .	295
<b>Activation of the hypertrophic right ventricle in the dog:</b> Gerrit E. Freud, Morag C. Stern, Hamish Watson, and Dirk Durrer . . . . .	302
<b>The effect of noradrenaline, adrenergic blocking agents, and tyramine on the intrarenal distribution of blood flow in the baboon:</b> L. Bomzon, C. Rosendorff, D. R. L. Scriven, and Judith Farr . . . . .	314
<b>Plasma renin activity during and after dynamic and static exercise:</b> J. G. Collier, J. Keddie, and B. F. Robinson . . . . .	323
<b>Continuous measurement of left ventricular volume using a single dimensional transducer: a comparison of two techniques in open chested dogs:</b> G. J. Wilson and D. H. Bergel . . . . .	327
<b>Quantitative evaluation of postectopic beats in the normal and failing human heart using indices derived from catheter-tip manometer readings:</b> Jiří Kvasnička, Bo Liander, Holger Broman, and Ed Varnauskas . . . . .	336
<b>Stress-induced and sympathetically-mediated electrocardiographic and circulatory variations in the primary hyperkinetic heart syndrome:</b> Maurizio Guazzi, Cesare Fiorentini, Alvise Polese, Fabio Magrini, and Maria Teresa Olivari . . . . .	342
<b>Glucagon-induced changes in the action potential, contraction, and <math>Na^+-K^+-ATPase</math> of cardiac muscle:</b> Kailash Prasad . . . . .	355
<b>Calcium-induced damage of rat heart mitochondria:</b> D. R. Parr, J. M. Wimhurst, and E. J. Harris . . . . .	366
<b>Myocardial function in general and regional left ventricular ischaemia in dogs at control and high aortic blood pressure:</b> Jon Lekven and Fredrik Kiil . . . . .	373
<b>Effects of dopamine on isolated canine coronary arteries:</b> Noboru Toda and Leon I. Goldberg . . . . .	384
<b>The feasibility of detecting His-bundle activity from the body surface:</b> Anthony Furness, Geoffrey P. Sharratt, and Peter Carson . . . . .	390
<b>A simplified parameter of LV function in children with congenital heart disease:</b> Paul Sekelj, Shyama Virmani, and George Collins . . . . .	397
<b>Influence of hypertonic mannitol on regional myocardial blood flow and ventricular performance in awake, intact dogs with prolonged coronary artery occlusion:</b> Ian Hutton, George C. Curry, Gordon H. Templeton, and James T. Willerson . . . . .	409
<b>A statistical prognostic study of pump failure in acute myocardial infarction:</b> Paco Lorente, Michel Delabre, Christiane Masquet, and René Gourgon . . . . .	420
<b>Effect of varying differentiator frequency response on recorded peak <math>dP/dt</math>:</b> William H. Barry, Anthony M. Marlon, Marsha Adams, and Donald C. Harrison . . . . .	433

### *Instruments and techniques*

- A simplified technique for the production of experimental aortic regurgitation:** G. J. Williams, J. Elston, and J. R. Muir . . . . . 440
- A new method for the direct estimation of blood oxygen content:** Lewis Adams and Peter Cole . . . . . 443

### *No. 4. JULY, 1975*

- Systolic pressure-diameter relations in the normal conscious dog:** Felix Mahler, James W. Covell, and John Ross, Jr . . . . . 447
- The fractional rate of change of ventricular power during isovolumic contraction. Derivation of haemodynamic terms and studies in dogs:** Paul D. Stein, G. Grady McBride, and Hani N. Sabbah . . . . . 456
- Ventricular fibrillation threshold in acute myocardial infarction and its relation to myocardial infarct size:** Colin M. Bloor, Ali Ehsani, Francis C. White, and Burton E. Sobel . . . . . 468
- The fractional disappearance rate of the separate isoenzymes of creatine phosphokinase in the dog:** Elliot Rapaport . . . . . 473
- Uptake of <sup>125</sup>I albumin by the endothelial surface of the isolated dog common carotid artery: effect of certain physical factors and metabolic inhibitors:** A. Siflinger, K. Parker, and C. G. Caro . . . . . 478
- Inhibitory action of acetylcholine on potassium uptake of the sinus node:** Ezio Musso and Mario Vassalle . . . . . 490
- Analysis of sino-atrial conduction in man using premature atrial stimulation:** Giuseppe Masini, Renzo Dianda, and Augusta Graziina . . . . . 498
- Mechanical effects of heart contraction on coronary flow:** Raul J. Domenech and Julio M. De La Prida . . . . . 509
- Dose response *in vivo* to digoxin in normo- and hyperkalaemia: associated biochemical changes:** Robert H. Goldman, D. John Coltart, Esther Schweizer, George Snidow, and Donald C. Harrison . . . . . 515
- Direct effect of thyroid hormone on intracardiac conduction in acute and chronic hyperthyroid animals:** Mahfouz El Shahawy, Miltiadis A. Stefadourous, Albert A. Carr, and Richard Conti . . . . . 524
- Inhibition of pacing-induced coronary dilatation by aminophylline:** Jacques Lammerant and Istvan Becsei . . . . . 532
- Changes in flow and pressure due to rotation of a saphenous vein segment:** Andrew Gordon, John Williams, and Brian Buxton . . . . . 538
- Optimal length of a saphenous vein segment when used as an arterial substitute:** Andrew Gordon, John Williams, and Brian Buxton . . . . . 541
- A model for the assessment of left ventricular compliance: effect of hypertrophy and infarction:** Michael Weiss and Werner Förster . . . . . 544
- Ultrasonic measurement of prosthetic heart valve action:** G. McIlmoyle, D. A. R. Robertson, W. N. McDicken, and D. H. Evans . . . . . 554
- Effects of prindolol on isoproterenol-induced subendocardial ischaemia in dogs with multiple chronic coronary artery occlusion:** W. Flameng, B. Wüsten, and W. Schaper . . . . . 561
- Effects of verapamil on infarct size following experimental coronary occlusion:** H. J. Smith, B. N. Singh, Heather D. Nisbet, and R. M. Norris . . . . . 569

*No. 5. SEPTEMBER, 1975*

<b>The effects of prolonged <math>\beta</math>-adrenoceptor blockade on heart weight and cardiac intracellular potentials in rabbits:</b> E. M. Vaughan Williams, A. E. G. Raine, A. A. Cabrera, and J. M. Whyte . . . . .	579
<b>Electrophysiological significance of rapid atrial pacing as a test of atrioventricular conduction:</b> Joe K. Bissett, James J. Kane, Neil de Soyza, and Marvin L. Murphy . . . . .	593
<b>Effect of transmembrane potential on the manifestations of ouabain toxicity in sheep cardiac Purkinje fibres:</b> Jeremiah M. Gelles, Ronald S. Aronson, and Brian F. Hoffman . . . . .	600
<b>Dynamics of tissue distribution of radiopotassium as affected by simulated differences in regional extraction:</b> H. Fred Downey and Fouad A. Bashour . . . . .	607
<b>Ventricular fibrillation threshold and vulnerable period in the isolated perfused rat heart:</b> W. F. Lubbe, O. L. Bricknell, and C. Marzagao . . . . .	613
<b>The effect of therapeutic doses of lidocaine hydrochloride on the effective refractory period of the right ventricle in man:</b> S. B. Olsson, R. Harper, L. Rydén, and W. A. Hilmy . . . . .	621
<b>Relationship between ST-segment elevation and local tissue flow during myocardial ischaemia in dogs:</b> Jon Lekven, Arnfinn Ilebakk, Erik Fønstelién, and Frederik Kiil . . . . .	627
<b>Myocardial distribution of coronary blood flow in the isolated supported heart preparation:</b> David C. Warltier, Harold F. Hardman, Atul R. Laddu, Pitambar Somani, and G. J. Gross . . . . .	634
<b>Oxygen demand and collateral vessels of the heart. Factors influencing the severity of myocardial ischaemic injury after experimental coronary artery occlusion:</b> Klaus Stephan, Werner Meesmann, and Volker Sadony . . . . .	640
<b>Effects of chronic graded ethanol consumption on the metabolism, ultrastructure, and mechanical function of the rat heart:</b> Leigh D. Segel, Stephan V. Rendig, Yves Choquet, Kurien Chacko, Ezra A. Amsterdam, and Dean T. Mason . . . . .	649
<b>Comparison of the handling of norepinephrine in the myocardium of adult and old rats:</b> Constantinos J. Limas . . . . .	664
<b>Static mechanical properties of the developing and mature rat aorta:</b> C. L. Berry, S. E. Greenwald, and J. F. Rivett . . . . .	669
<b>The dynamic and static elastic response of the abdominal aorta of the dog:</b> D. L. Newman, N. L. R. Bowden, and R. G. Gosling . . . . .	679
<b>Pathological effects of intra-arterial blood transfusions in dogs:</b> G. Wright . . . . .	685
<b>Pulmonary vasoconstriction produced by protamine and protamine-heparin complex in the isolated cat lung perfused with blood or dextran:</b> J. Jastrzebski, P. Hilgard, and M. K. Sykes . . . . .	691
<b>Estimation of non-autonomic and autonomic components of iliac bed vascular resistance in renal hypertensive rabbits:</b> M. J. West, J. A. Angus, and P. I. Korner . . . . .	697

*No. 6. NOVEMBER, 1975*

<b>Changes in left ventricular internal diameter with increasing pericardial pressure:</b> Barbara L. Pegram, Merrill B. Kardon, and Vernon S. Bishop . . . . .	707
<b>An evaluation of the pericardial sac as a safety factor during tamponade:</b> Barbara L. Pegram and Vernon S. Bishop . . . . .	715

<b>Quantitative analysis of the acute response to haemorrhage of the renin-angiotensin-vasoconstrictor feedback loop in areflexic dogs:</b> Royce B. Brough, Jr, Allen W. Cowley, Jr, and Arthur C. Guyton . . . . .	722
<b>Short-term variability of pulse rate and blood pressure in cardiac surgery patients:</b> D. E. M. Taylor, Joan S. Whamond, D. J. Hitchings, M. Hullinger, and D. Begg. . . . .	734
<b>Changes in glomerular filtration rate following myocardial infarction:</b> M. C. Efendigil, A. Harley, T. Deegan, and C. S. McKendrick . . . . .	741
<b>Responses to exercise in experimental hypertension:</b> Thomas Baum and Allen T. Shropshire . . . . .	745
<b>Haemodynamic studies during short-term preservation of the autoperfusing heart-lung preparation:</b> D. K. C. Cooper . . . . .	753
<b>Effects of local anaesthetics on calcium transport by canine cardiac microsomes (fragmented sarcoplasmic reticulum):</b> Arnold M. Katz, Doris I. Repke, Susan Corkedale, and Janet Schwarz . . . . .	764
<b>The effects of isoprenaline on epicardial ST-segment elevation, lactate production, and myocardial blood flow following coronary artery ligation:</b> R. M. Norris, H. J. Smith, B. N. Singh, Heather Nisbet, M. B. John, and P. J. Hurley . . . . .	770
<b>Effects of catecholamines on the coronary circulation in the Langendorff-type transplanted dog heart:</b> R. W. Giles, E. Eikens, H. J. Paoloni, W. E. Glover, and D. E. L. Wilcken . . . . .	779
<b>Haemodynamic effects of a new anti-arrhythmic agent, mexiletine (Kö 1173) in ischaemic heart disease:</b> K. I. Saunamäki . . . . .	788
<b>The effect of isoprenaline and propranolol on rat myocardial ornithine decarboxylase:</b> J. Wayne Warnica, Paula Antony, Keith Gibson, and Peter Harris . . . . .	793
<b>Quantitation of isoprenaline-induced changes in the ventricular myocardium:</b> P. Collins, C. G. Billings, G. R. Barer, J. J. Daly, and A. Jolly . . . . .	797
<b>Effects of three fat-enriched diets on the arterial pressure of rabbits:</b> P. G. Burstyn and W. R. Firth . . . . .	807
<b>Myocardial oxygen consumption at constant left ventricular workload and varying arterial oxygenation:</b> A. C. Kralios, T. J. Tsagaris, and H. Kuida . . . . .	811
